

Minors and Consent Policy

Category: Compliance | Policy No: CHA-POL-014 | Effective: 01 Jan 2026 | Version: 1.2

Patients under 16 require parental or legal guardian consent for non-emergency treatment, except for specific services (e.g., reproductive health counseling) where regional law permits independent consent from age 14. Any suspicion of abuse or neglect involving a minor patient must be reported to the designated child protection officer within 1 hour, regardless of parental consent status.
