

Homelessness Support and Referral Protocol

Category: Community Outreach | Policy No: CHA-POL-016 | Effective: 01 Jan 2026 | Version: 1.2

Patients identified as unhoused during intake should be offered a warm referral to the partner shelter network, subject to bed availability. Medical documentation for unhoused patients does not require a fixed address; the clinic's own address may be used for prescription and referral purposes. Staff should coordinate with the outreach team weekly to track follow-up on referred cases.
