

Patient Intake Procedure

Category: Clinical Operations | Policy No: CHA-POL-002 | Effective: 01 Jan 2026 | Version: 1.2

All new patients must complete the baseline health questionnaire and provide a valid government-issued ID or community-recognized identity paper. If a patient is unhoused or lacks identification, staff can issue a provisional ID waiver countersigned by a shift supervisor. Intake interviews must be conducted in the patient's preferred primary language using our translation service if necessary.
