

Staff Wellbeing and Burnout Prevention Policy

Category: HR | Policy No: CHA-POL-023 | Effective: 01 Jan 2026 | Version: 1.2

All clinical staff are entitled to a confidential wellbeing check-in with the HR liaison every quarter, in addition to standard performance reviews. Staff working more than three consecutive high-acuity shifts must be flagged for a mandatory rest period by their supervisor. Reports of burnout symptoms should trigger a workload review within 10 business days, not solely a wellbeing referral.
