

Mental Health Referral Pathway

Category: Clinical Operations | Policy No: CHA-POL-007 | Effective: 01 Jan 2026 | Version: 1.2

Patients presenting with signs of acute psychological distress must be assessed using the standard triage checklist before referral. Non-urgent referrals go through the partner counseling network with an average wait time of 5-10 business days. Any disclosure of suicidal ideation triggers an immediate warm handoff to the on-site mental health liaison, who must be contacted within 30 minutes.
